11. Description of proposed works. (Under the provision of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e., diversion structure, ditches, pipes and flumes or drilled well, pump and motor, etc.)

All of the buried pipe and surface pipe is already in place from the previous permit (64848). The only work that will have to be done is to change the existing pump to increase output.12. Estimated cost of works 8,000 to 10,000.13. Estimated time required to construct works 1 year 16" casing 200' deep.
If well completed, describe well.14. Estimated time required to complete the application of water to beneficial use 1 year

15. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

There are three corners adjacent to this new point of diversion that are not irrigated by the irrigation pivots that irrigate all of the 1/4 sections with the exception of the corners. I plan on increasing the pump output so I can irrigate the area covered by the pivot on this well along with the three adjacent corners. I already have a buried 10" PVC mainline with 4" risers spaced 45' feet apart that will supply water to the existing 3" solid set aluminum irrigation pipe already in place.

16. Miscellaneous remarks:

The total amount to be irrigated in each corner will be 7.5 acres with a total of 22.5 acres.scoppettone@mwpower.net
